Amendments to the Abstract:

Replace the original abstract with the following.

At present, a portable telephone which is capable of connection to the Internet and of sending and receiving electronic mails by use of a communication function has been developed, but for example, in a foldable portable telephone, in case of sending a mail, there is a necessity to take the trouble to open the portable telephone and to input characters by use of a main liquid crystal display panel and an operation keyboard which ~~were~~ are formed on the front surface of the housing~~, and a study regarding usability has not been carried out sufficiently.~~

~~———~~In order to solve ~~the above-described~~ this problem, ~~provided is~~ a portable terminal ~~in which a~~ has first and ~~a~~ second housings which are foldable through use of a hinge part, and in a state ~~that~~ in which the first housing and the second housing have been folded, it is possible to shoot a motion picture or a still picture. Also~~, and~~, in the state ~~that~~ in which the first housing and the second housing have been folded, by use of a screen display which does not have an input region ~~of~~ for character information, the motion picture or the still picture which was shot is sent to a desired address.
